EXPERIENCE

Pilot

Design Lead

Jan 2023 - Present

I lead the design efforts and product vision at Pilot. I was promoted after I successfully increased user activation by 45% and grew lifetime users to +20,000 across the web app, including hotel search & booking flows. I designed and launched the "Quick Start" AI feature, which helped us raise +\$300,000 from investors and received positive user feedback. I move fast with data, from insights found conducting A/B tests, I learned I improved the conversion rate of the "Quick Start" feature by 30%.

Additionally, I facilitated +30 user interviews and surveys, to inform long term product strategy and and quarterly roadmaps. I also designed, tested, and released the Pilot mobile app for both iOS and Android. Throughout this process, I led weekly collaborative design workshops with engineers, product managers, and the CEO to ensure alignment on new features.

I also played a critical role in hiring and mentoring a junior designer after conducting interviews and reviewing design challenges.

Nook Calendar

UX & Marketing Designer

Jan - Dec 2022

Xesto Fit

User Experience Designer

Jul 2021 - Jan 2022

University Health Network (UHN) Openlab
